

## aaudio 范例: 查询自定义日志

```
//查询自定义日志
//相关范例: ~\codes\范例程序\9) 网络应用\0) 网络管理\6) wlanEnumInterfaces.aaudio

import console.int;
import System.Diagnostics.Eventing;

//查询条件
var query = System.Diagnostics.Eventing.Reader.EventLogQuery("Microsoft-Windows-NetworkProfile/Operational",1)
query.ReverseDirection = true;//设置查询方向为从最新到最早

//读日志对象
var logReader = System.Diagnostics.Eventing.Reader.EventLogReader(query);

//遍历事件记录
while( var eventInstance = logReader.ReadEvent() ) {

    //联网事件
    if(eventInstance.Id==10000
        || eventInstance.Id==10001){

        console.log( eventInstance.TimeCreated ,eventInstance.Id )
        console.log( eventInstance.FormatDescription() )
        console.more(1)
    }
}
```
