

[aardio 文档](#)

aardio 范例: 客户端

```
//客户端
import zeromq;
import console.int;

var context = zeromq.context(10)
//request模式socket与服务端的reply模式配对使用
var requester = context.zmq_socket_request() ;

requester.connect( "tcp://localhost:5559" )
if( requester.connect( "tcp://localhost:5559" ) ){
    console.log("连接成功")
}

var msg = zeromq.message("服务端你好")
requester.sendMessage(msg)
msg.close();

var reply = zeromq.message()
requester.recvMsg(reply);
console.log( "客户端收到消息 ", reply.getString() );
reply.close()

//关闭socket,不然context.term()无法退出
requester.close();

context.term();
```
