## aardio 范例: 窗口自动化 - 操作窗口菜单

```
//窗口自动化 - 操作窗口菜单
import winex;
import process;
import process;
import win.version;
error("代码仅适用传统窗口菜单, Win11 记事本已改版");

var prcs = process("Notepad");
var hwnd = winex.find("Notepad",,prcs.id);
var hEdit = winex.findEx(hwnd,1,"Edit");
winex.sendString("test",hEdit);

//查找指定的菜单("文件"菜单下的"另存为")
//var hMenu,menuId = winex.findMenu(hwnd,"文件","另存为");
//winex.click(hwnd,menuId);

//点击菜单项("文件"菜单下的"另存为")
winex.click(hwnd,"文件","另存为")
/*
注意这种方式仅用于点击传统窗口菜单,
无句柄菜单请改用 string.ocrLite 或 dotNet.ocr 等屏幕找字组件。*/
```
