aardio 范例: MSAA 自动化 - 遍历元素

```
//MSAA 自动化 - 遍历元素
import winex;
import winex.accObject;
import console;

for hwnd in winex.each( "TXGuiFoundation" ) {
    var accObject = winex.accObject.fromWindow(hwnd)
    if(accObject){
        var accMessage = accObject.find(role="list")
        if(accMessage){
            for accChild in accMessage.each(){
                console.log(accChild.roleText(),accChild.name(),accChild.value())
            }
        }

        var accEditor = accObject.find(
            role = "editable text";
            name = "输入";
        )

        if(accEditor){
            var r = accEditor.takeFocus();
            winex.sayIme("test",hwnd)
        }
    }
}

console.pause(true);
```
